EDUCATION

University of Maryland - College Park

Bachelor of Science in Computer Science, Minor in Classical Mythology

Bachelor of Science in Immersive Media Design

College Park, MD

Aug 2024 – May 2028

Aug 2026 – May 2028

EXPERIENCE

Game Design Intern

Atlas Arena (now Nexus Games)

- Designed a new game mode alongside a multidisciplinary team for the Atlas Arena platform.
- Developed new gameplay systems based on their in-house puzzle game "Polar Winds" using an agentic workflow
- Newly created training mode enabled users to practice multiplayer gameplay alongside AI-controlled companions instead of a matchmade human team

Project Manager & UI Designer

Jake's Ice Cream

- Communicated daily with owners through emails and meetings to prototype and design a calculator app for differently abled workers
- Iteratively designed new prototypes using direct end-user feedback to improve user experience
- Assisted with deploying the app in-store, which is still used daily to streamline workflow for cashiers

PROJECTS

SLORL | *Unity, C#, Git, Aseprite*

- Developed and launched a web-based puzzle platformer in Unity, designing game mechanics, levels, and visual art direction
- Published game on Armor Games, Kongregate, and Y8 Games, achieving 10K+ plays and a 71% player rating on Armor Games
- Integrated platform APIs and SDKs to optimize game functionality and ensure compatibility across websites

Bounty | *Unity, C#, Git*

- Collaborated with a multidisciplinary team to iteratively design and refine the game's art style, mechanics, and sound design
- Built core gameplay systems in C# for a mouse-based rhythm game, including beatmap parsing, scoring logic, and character control
- Assembled Unity scenes to drive core gameplay functionality, integrating prefabs, scripts, and UI

Boxing Simulator VR | *Unity, C#, Git, Meta XR SDK*

- Developed an immersive XR boxing game that teaches fundamental techniques through interactive, motion-driven gameplay
- Implemented spatial audio, physics-based object interaction, and real-world-to-VR locomotion to create an immersive XR experience

TECHNICAL SKILLS

Languages: C#, C++*, C, Java, JavaScript, HTML/CSS, Python, OCaml, SQLite

Game Design Tools : Unity, Godot, Aseprite, Adobe Suite*, Paint.NET

Developer Tools: Git, VS Code, Visual Studio, Eclipse
